THE **12** AGILE PRINCIPLES

1 Our highest priority is to satisfy the customer through **EARLY AND CONTINUOUS DELIVERY** of valuable software

2 Welcome **CHANGING REQUIREMENTS**, even late in development. Agile processes harness change for the customer's competitive advantage.

3 **DELIVER WORKING SOFTWARE FREQUENTLY**, with preference to a shorter timescale

4 Business people and developers must **WORK TOGETHER DAILY** throughout the project

5 Build projects around **MOTIVATED INDIVIDUALS**. Give them the environment and support they need, and trust them to get the job done.

6 The most efficient and effective method of conveying information to and within a development team is **FACE-TO-FACE CONVERSATION**

7 **WORKING SOFTWARE** is the primary measure of progress

8 Agile processes promote **SUSTAINABLE DEVELOPMENT**. We should be able to maintain a constant pace indefinitely.

9 Continuous attention to **TECHNICAL EXCELLENCE AND GOOD DESIGN** enhances agility

10 **SIMPLICITY** - the art of maximizing the amount of work not done - is essential

11 The best architectures, requirements, and designs emerge from **SELF-ORGANIZING TEAMS**

12 At regular intervals, **THE TEAM REFLECTS** on how to become more effective, then tunes and adjusts its behavior accordingly
